EASILY THE BEST COMPACTION.
FOR PROFESSIONALS: BOMAG LIGHT EQUIPMENT.
You mend, repair and create so that our environment remains worth living in. To make this work easier for you we built the best machines – from tampers and vibratory plates to hand-guided vibratory rollers and multi-purpose compactors. For over 60 years, the history of our company has been synonymous with the history of compaction.

With our accumulated know-how, we are an innovation driver that sets the pace for an entire industry. BOMAG has developed a huge number of technologies, from systems for measuring and improving compaction, such as the ECONOMIZER, to technologies for reducing operating costs, such as ECOMODE. We offer effective solutions for a wide range of applications, for example, the unique STONEGUARD technology which prevents block paving from fracturing during vibratory compaction.

Our global network of expert and partners in over 120 countries is there to support you, from the configuration of the machines to providing solutions for the most challenging tasks.

We owe our innovative strength to our more than 2,500 employees worldwide, their commitment and their unique wealth of experience. A source of know-how which has propelled us to worldwide market leadership. The reason for this is our commitment to quality: in product development and production, in the qualification of our employees, and in a service that guarantees optimal on-site support.
COMPACTION MEANS BOMAG.

If you work your sites hard, you need machines you can rely on. That’s why at BOMAG we have specialised in easy handling, robust and safe equipment for decades. And this will never change.

HITTING IT BIG WITH SMALL MACHINES.
When BOMAG built the BW 60, the world’s first hand-guided double vibratory all-drum drive roller in 1957, the model became a milestone in compaction performance.

The close relationship with our customers back then allowed us, as it still does, to develop machines and systems that make site-work easier. This legacy is something customers around the world value and is the reason the industry places its trust in BOMAG.

READY. STEADY. RUN.

WORK AT EASE. BOMAG TAMPERs.
Stress-free operation: switch on, start up, and off you go. With a robust design, intuitive operation, and safe handling, BOMAG tampers are first choice on every construction site.
Robust, reliable and extremely tough: these 4-stroke engine BOMAG tampers are ideal for trench and sewage systems, gardening and landscaping, compaction on backfill, foundations, patching and repairs. Less effort to operate, durable, designed to deliver high performance.

FOUR STROKE WINNER.

A POWER-PACKED UNIT: MODEL BT 65 FOR MAXIMUM COMPACTION PERFORMANCE.

The most powerful tamper in its class: for heavy-duty usage, the best compaction results and overall efficiency. The reference class for professional users.
LIGHTWEIGHT: MODEL BT 60
EFFORTLESS HANDLING.
The lightest tamper in this performance class: ideal for long working shifts in confined spaces. The reference class for professional users.

ECONOMY MODEL: BVT 65
FOR ALL-ROUND COMPACTING PERFORMANCE.
Sets the standards in the premium class: for economic use on a wide range of applications. BOMAG performance: Outstanding design.

DIESEL POWER: MODEL BT 80 D
FOR THE MOST CHALLENGING CONDITIONS.
Diesel power for extended use on tough sites. The specialist model for demanding jobs needing extra impact forces and productivity.

BOMAG tampers with Honda GXR 120 petrol engines (BT 60 and BT 65) can also be used in trenches that are deeper than a man’s height and are at least 1.5 m wide. They are on the funding list of BG BAU: www.bgbau.de (BG Bau, Germany, 2015)
ROBUST IN THE DETAILS.

WELL-LUBRICATED
A unique BOMAG lubrication system provides optimum oil supply in the crankcase at all angles. The engine is also protected by the automatic oil level check system.

LONGER SERVICE LIFE
The two-stage dual air filter system on BT series petrol models gives maximum availability and extended service life.

QUICK TO MOVE
Optional transport wheels for easy handling around site.
The engine protection cover provides optimum damage protection on-site. Even heavy-handling off the delivery truck won’t damage the durable plastic, reducing repair costs by up to 33%.

ALL AT A GLANCE
Stay up to date with hour counter and tachometer plus integrated service display.

SAFE OPERATION
The height adjustable, anti-vibration guide handle can be adjusted to suit every operator. Ensuring fatigue-free work.

EVERYTHING UNDER CONTROL
ON/OFF safety easy-action switch for prompt engine and fuel start-up and shutdown.

FULLY PROTECTED
The engine protection cover provides optimum damage protection on-site. Even heavy-handling off the delivery truck won’t damage the durable plastic, reducing repair costs by up to 33%.

The delivered machine specification depends on model type, selected options, and the country of sale.
Working in deep trenches or enclosed spaces? No problem with the new reduced-CO emission BOMAG tamper models. And for users wishing for even greater safety and environmental features, the BOMAG G series is the answer. The gas drive unit means only negligible amounts of CO are produced. A practical solution for challenging job conditions.
BREATHE EASILY:
BOMAG offers the first worldwide models driven by gas, the BT 60 G and BT 65 G tampers. These units excel with almost untraceable CO emissions. They are highly environmentally-friendly and safeguard operator health under extreme job conditions.

These tampers are equipped with the latest 4-stroke engines fuelled by standard propane gas. The two safety bottles can be filled and re-filled with ease on site. A full tank will give 2 hours’ operation.

NOT JUST CLEAN, BUT PRISTINE.

Some jobs present bigger challenges than others: e.g. enclosed spaces or deep trenches. The first gas-operated tamper worldwide from BOMAG meets the highest health and safety demands for extreme site conditions.
ALWAYS ON THE MOVE.
ON ANY SURFACE.

PRESS AHEAD. WITH BOMAG SINGLE DIRECTION VIBRATORY PLATES.
You can trust BOMAG quality and performance on all small site operations. High output. Reliability. For earthworks, bases, asphalt or block paving. And now we’ve made our small plates even more robust.
QUALITY COMPACTION.

BOMAG single direction vibratory plates are designed for use on all earthworks, asphalt and paving applications. The range offers the right solution every time plus extra BOMAG reliability and compaction power.

For a fast repair, small area or patching job. These units offer easy handling and economic operation. Especially useful in tight corners or on areas difficult to access.

THE ASPHALT SPECIALIST: MODEL BP 12/50 A.
Fitted with a special base plate, this unit is ideal for all asphalt applications. No scuffs on the asphalt surface when turning. This model gives a perfect surface finish.

POWER-PACKED UNITS: MODELS BP 20/50, BP 20/50 D, BP 25/50 AND BP 25/50 D.
These are the right plates for the specialist user who needs to meet the highest compaction demands every time.
ALL-ROUNDERS: MODELS BVP 10/36 AND BVP 18/45.
These compact, versatile units are indispensable for day-to-day use on the most frequent applications in repair and maintenance works, earthworks, asphalt and paving. Developed for contractors who demand BOMAG quality!
THE GREATNESS IS IN THE DETAILS.

**OPTIMALLY CUSHIONED**
The hinged guide handle is mounted on effective "silentblock" rubber mounts which reduce hand/arm vibrations to the minimum. This feature applies to both the BP and BVP series.

**EASILY HANDLED**
The transport handles guarantee a safe grip on all models for loading.

**SENSITIVELY COMPACTED**
Optional plastic mats provide optimum protection against damage of the pavement surface. A clear advantage on coated surfaces. Available for all models.
QUICKLY FILLED
The removable water tank on the BP series has a larger capacity and is even equipped with a level indicator.

MADE SAFE
The V-belt guard, standard on all models, provides the operator with permanent protection from injury and the fully enclosed design results in fewer repairs.

BUILT TOUGH
For tough-going: the protective frame is designed to protect the engine and other components from impacts, mishaps and rough handling.

Technical modifications required depending on country of use.
RELIABLE. HIGH OUTPUT. FORGE AHEAD.

ALL-ROUND PROTECTION. BOMAG REVERSIBLE VIBRATORY PLATES.
When more compaction output and surface coverage is needed these are the ideal models. All units in this range feature effective impact protection and outstanding compaction power.
MEDIUM-WEIGHT POWERHOUSES:
BPR-PERFORMANCE CLASS 45 TO 60 KN.
The 350 to 500 kg operating weights of these
diesel-operated vibratory plates from BOMAG
provide excellent compaction results and superb
surface coverage, especially on earthworks and
paving work.
MACHINES FOR PROFESSIONALS.

Reversible vibratory plates are popular choices on many small and medium-sized construction sites. BOMAG offers a full range of models with operating weights from 120 to 750 kg. These are uncompromising compaction units for earthworks, asphalt and block paving.

**LIGHT ALL-ROUNDER:**
PERFORMANCE CLASS 25 TO 40 KN.
With operating weights of 120 to 300 kg and optional transport wheels, these models are easy to transport and are ideal for a very wide range of applications.

**HEAVYWEIGHT POWER PACK:**
BPR PERFORMANCE CLASS 70 TO 100 KN.
With large working widths and massive compaction power, these heavyweight models provide top performance on tough sites.

**REMOTE CONTROLLED POWERHOUSE:**
MODEL BPH 80/65 S.
The ultimate compaction power for trench, sewer and pipeline construction. Radio/cable or cable remote control makes work easy and provides an extra level of safety.
Robust, solid rubber transport wheels are quick-mounting, allowing easy movement to the next site. Available on all models up to 300 kg.

QUICKLY MOVED

The TipControl and integrated reversing protection as standard provide maximum safety and easy operation in the over 500 kg class.

EASILY MANOEUVRED
The hinged, all-round protection hood provides maximum protection and optimum access to the engine and other components, saving time and money.

Every operator can select the ideal working position with the height adjustable, low-vibration steering rod.

Technical modifications may be required depending on country of distribution.
The BOMAG ECONOMIZER shows the operator real-time compaction progress on a continuous easy-read display. This support system prevents unnecessary passes and immediately identifies weak spots. The BOMAG ECONOMIZER is available on all reversible vibratory plates over 350 kg.
NOTHING GETS BROKEN HERE.

STONEGUARD. THE PAVING PLATE.
With conventional compaction equipment, the breakage rate of paving stones is often as high as 30%. Costs can easily escalate. The new BOMAG paving plate is designed to prevent this type of loss. The STONEGUARD series includes several models of reversible vibratory plates with operating weights between 150 and 500 kg. Using this unique paving plate, contractors achieve hitherto unachievable results in terms of surface coverage, handling and quality, with the added bonus of reduced block breakage rates.

OVERVIEW OF BENEFITS:
■ Increases working speed by up to 30%
■ Prevents edge and paving block breakages
■ Allows vibratory compaction to the final block
■ Allows vibratory compaction of large slabs
■ Prevents damage to surrounding structures
COMPACTION QUALITY.
EVERY TIME. EVERY SITE.

THE ORIGINAL – BOMAG HAND-GUIDED ROLLERS.
BOMAG has been the leader in hand-guided rollers since 1957. Beginning with one model, now an entire range of single-drum and double vibratory rollers that have one thing in common: a better compaction result.
HEAVY-DUTY DOUBLE VIBRATORY ROLLER:
MODEL BW 75 H.
This high-performance wonder is ideal for asphalt construction and earthworks. The 750 mm drum width and the high compaction power of all hand-guided models automatically provides outstanding surface coverage.

LIGHT DUTY SINGLE DRUM VIBRATORY ROLLER:
BW 55 E.
This light all-round model stands out with easy handling in confined spaces. Ideal whenever manoeuvrability and easy transport are key factors. The pioneer in its class.

HEAVY DUTY SINGLE DRUM VIBRATORY ROLLER:
BW 71 E-2.
The BW 71 E-2 excels for surface quality and coverage, especially on asphalt applications and repair and maintenance work. The large 600 mm drum diameter and 710 mm working width give excellent finishing results.
MILESTONES IN COMPACTION TECHNOLOGY.

No other manufacturer has as many years of experience as BOMAG, as this is where it all began with the first hand-guided double vibratory roller. Technology has developed steadily since then. But one thing remains the same: the unrivalled compaction quality and reliability of a BOMAG roller.

LIGHT DOUBLE VIBRATORY ROLLER:
MODEL BW 65 H.
This best-selling model features BOMAG double vibration with hydrostatic drive to guarantee smooth speed control and high travel speeds.
QUICKLY STOWED
The hinged steering rod offers space-saving transportation and convenient loading.

UNIVERSALLY EMPLOYED
All hand-guided vibratory rollers are equipped with a water tank as standard.

DEPENDABLY POWERED
The maintenance-free, mechanical drive ensures constant traction on any job.

THE INNER VALUES ARE WHAT REALLY COUNT.
BURSTING WITH POWER
The proven BOMAG double vibration system produces uniquely quiet and smooth running characteristics giving uniform surface quality. Compaction and surface coverage is outstanding with high centrifugal forces and excellent working speed.

EASILY STARTED
Manual or electric start comes as standard with these double vibratory rollers.

SAFELY OPERATED
From speed control to vibration mode: all functions are easy and safe for the operator to control on one handle.

Technical modifications may be required depending on country of distribution.
MADE FOR SOIL COMPACTION.
WELL-DESIGNED. SAFE.

INTELLIGENT OPERATION. BOMAG MULTI-PURPOSE COMPACTOR.
When work demands high-quality solutions: this articulated, radio-controlled, multi-purpose compactor gets to the places where operators can’t go or would rather not go. With the radio remote control, you have everything safely under control. Including your site.
SUPERIOR COMPACTION.

With an operating weight of around 1.6 t, this multi-purpose compactor achieves outstanding compaction results on soil compaction in trenches, sewers and on pipeline construction.
The BOMAG BMP 8500 articulated, multi-purpose compactor was specially designed for earthworks; it is particularly suitable for compaction on cohesive soils in trenches, backfills, sewer and pipeline construction, and sub-structural and foundation work. And anywhere space gets tight or the job gets hazardous.

**Earthworks Evolution.**

**Removable Drum Extension with Pad Feet.**

The working width can be easily varied between 610 and 850 mm with the drum extensions which come as standard. They are ready for use in any trench in minutes.

**Also Available with Smooth Drums.**

The BOMAG BMP 8500 can also be optionally equipped with a smooth drum for improved surface quality without pad footprints, even on sandy materials.
Reliability from experience: the original BOMAG drum extender allows you to adapt the working width from 610 to 850 mm in just minutes.

QUICKLY EXTENDED
Reliability from experience: the original BOMAG drum extender allows you to adapt the working width from 610 to 850 mm in just minutes.

MOST RELIABLE ENGINE
Both the modern KUBOTA engine and BOMAG ECOMODE provide the lowest operating costs. If the remote control is not activated, the engine will automatically change to idle speed after a few seconds. That saves hard cash.
The fully encased exciter housing prevents water and dirt ingress, as well as abrasion to the hydraulic hoses. This increases operational safety and prevents costly repair work over the long term.

**RELIABLE RADIO CONTROL**
With radio/cable remote control, problems caused by intense sunlight, shoring work, or the simultaneous use of other machines are eliminated. Frequency adjustments and malfunctions due to mechanical wear no longer apply.

**SAFE RESPONSE**
If the operator enters into the close vicinity of the machine, the travel system is automatically stopped by BOSS (BOMAG Operator Safety System) to prevent accidents. Nothing could be safer.

**BUILT-IN SAFETY**
The fully encased exciter housing prevents water and dirt ingress, as well as abrasion to the hydraulic hoses. This increases operational safety and prevents costly repair work over the long term.
KNOWING WHEN THE JOB IS DONE.

The BMP 8500 remote-controlled multi-purpose compactor is best used when conditions become confined or inaccessible. Featuring legendary BOMAG quality, this is the first machine of this type to display compaction progress. Guessing is now a thing of the past.

THE OPERATOR KNOWS WHEN COMPACTION IS FINISHED.

Unique in compaction technology: The BOMAG ECONOMIZER is integrated into the hood of the BMP 8500, which means it is easy to see and well protected. The unit aids the operator in achieving optimum compaction results and could not be simpler, as there is no need for activation and calibration.

The ECONOMIZER automatically determines compaction progress. This allows the operator to identify weak spots in the subsoil continuously and accurately, and to respond appropriately in good time. Expensive reworking is no longer necessary. In addition, unnecessary passes and overcompaction are also avoided which results in time savings of up to 25%.
EARTHWORKS REVOLUTION.
The first remote-controlled, multi-purpose compactor that knows when it’s finished. With ECONOMIZER, the operator knows when optimum compaction has been achieved.
ALWAYS THE RIGHT CHOICE: BOMAG ORIGINAL PARTS AND SERVICE.

You deliberately opted for a BOMAG when deciding on your machine. To ensure the long-term performance of your equipment, you can also rely on the tried and trusted quality of BOMAG’s service and genuine parts.

GUARANTEED BOMAG QUALITY.
If you work a site hard, you need to be able to rely on your machines. This is why every BOMAG machine is tested thoroughly, inside and out. We have total confidence in the quality of our machines, which is why we offer the 3-2-1 warranty as standard.
ALL SERVICE PARTS IN ONE BOX.
BOMAG service kits have been individually compiled by our service experts for your machine and contain all parts needed for top maintenance in one handy package. And you save money - up to 15% compared to individual orders.

UNIQUELY BOMAG.
BOMAG original parts are matched exactly to your machine, and offer reliability and proven quality. Unlike copies, they meet our highest quality standards in terms of functionality and service life so that your BOMAG remains a BOMAG.

ALWAYS RELIABLE.
The best service and high availability of original parts are included when you purchase your BOMAG. You may count on us as a global partner, with twelve companies abroad and over 500 dealers in more than 120 countries. No matter where your machine’s working, we will never let you down!
### APPLICATION TIPS FOR EARTHWORKS AND ASPHALT.

Guidelines* for the non-compacted/compacted layer thickness dependant on soil type and type of compaction equipment.

MULTI-PURPOSE COMPACTORS

Subject to technical modifications. Machines may be shown with optional extras.
IN EVERY MACHINE.
COMPACT KNOW-HOW FROM OUR
SHARED WEALTH OF EXPERIENCE.

From tampers to multi-purpose compactors: our near 60 years of compaction experience is incorporated into every machine. Plus our understanding of your needs. Because every conversation we have with you makes us wiser and our machines better. Thank you for your confidence in BOMAG!
